M-CONNECT

Harvest Registration

New from Munckhof Fruit Tech Innovators

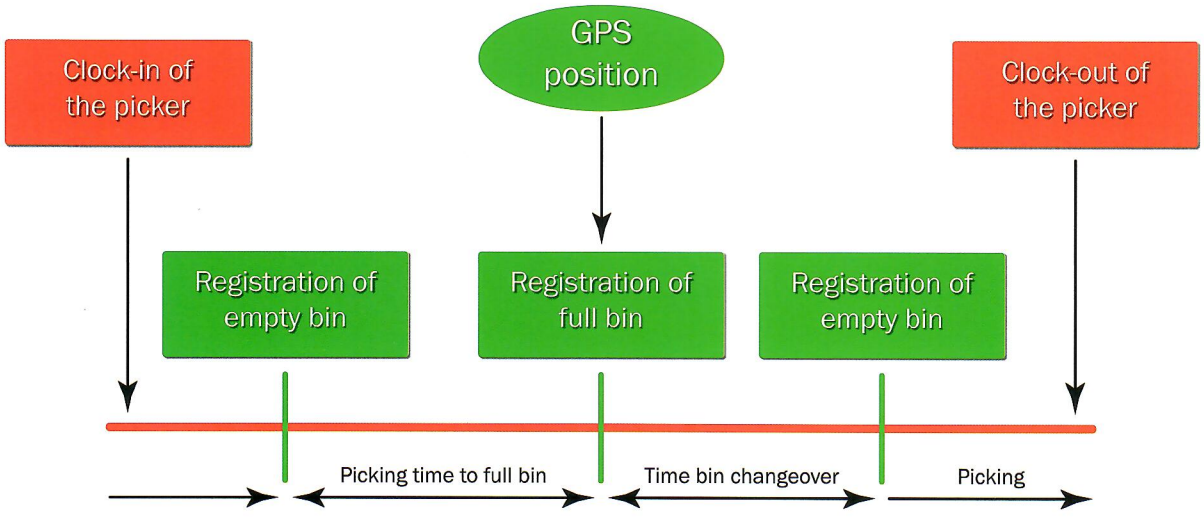
M-Connect is the system to record your harvest on your Pluk-o-Trak. This system gives full insight into the harvesting performance at tree and bin level.

With this system you can:

- record the time for filling the bins;
- record the time required for a bin changeover;
- record the picking time per picker;
- record the number of apples;
- measure the size of each apple.

The process in pictures:

Harvest Registration Module – the process



Collaboration with Agromanager >> All results will be recorded in Agromanager
